SUMMARY

Software Engineer with experience building scalable SaaS platforms, AI-powered products, and backend systems using FastAPI, Next.js, PostgreSQL, Redis, and AWS. Skilled in developing multi-tenant applications, commission engines, business workflows, and cloud-native solutions with hands-on exposure to CI/CD automation and modern full-stack development. Based in Dubai, UAE.

Technical Expertise

- **Programming Languages:** Python, JavaScript, TypeScript.
- **Frontend:** HTML, CSS, React.js, Next.js, Tailwind CSS, Bootstrap.
- **Backend:** FastAPI, Django, Flask, DRF, REST APIs, Redis, Celery.
- **Integrations:** Stripe, AI/LLM APIs, CRM systems, Webhooks.
- **Databases:** MySQL, PostgreSQL, MongoDB.
- **Tools & Workflow:** Git, GitHub, Linux, CI/CD, JWT Authentication, Figma.
- **Testing & Documentation:** Pytest, Postman, Hoppscotch, Jira, Unit Testing, Integration testing.
- **Cloud & Infrastructure:** AWS (ECR, EC2, ECS, S3, CloudWatch, SES, IAM, Amplify, LightSail, Cognito), Docker, Vercel, Cloudflare.
- **Languages:** English (Fluent), Hindi (Intermediate), Malayalam (Native).

EXPERIENCE

Software Engineer – Apistride

Dec 2025 – Jul 2026

- Built and deployed multi-tenant SaaS platform on AWS with RBAC for organizations, branches, groups, and users.
- Reduced deployment time by 70% through CI/CD automation and release optimization.
- Cut infrastructure costs by 3x through strategic AWS service selection and architecture improvements.
- Developed AI-powered scheme generation, impact analysis, anomaly detection, nudges, and LLM workflows.
- Built business dashboards for ROI, commissions, targets, payouts, and disputes to support faster decisions.
- Built Control Center dashboard enabling centralized monitoring, administration, reporting, user management, and operational oversight across the platform.

Jr Software Engineer – Harwex Technology Private Limited

Aug 2025 – Nov 2025

- Delivered two commercial-grade mobile and web applications using Flask, REST APIs, and MySQL, accelerating development cycles by 70% and enhancing backend data performance.
- Built OCR automation, Celery Beat tasks, and AI-driven workflows to improve efficiency and user experience.
- Collaborated with backend teams on scalable code optimization and structured reviews, improving quality.

Python Full-Stack Intern, Inmakes Infotech

Feb 2025 – May 2025

- Built full-stack web applications using Django, React, and MySQL, reducing development time by 30%.
- Improved data efficiency by 40% through optimized backend logic, testing, and collaborative code reviews.

Tech Lead – Tinker hub KMCTCE

Jan 2023 – Dec 2024

- Led coding initiatives and trained 60+ students in hands-on development programs.

PROJECTS

Perslace – Multi-Tenant Commission Management SaaS Platform

FastAPI, Next.js, PostgreSQL, Redis, AI APIs, AWS

- Built production-grade multi-tenant SaaS platform with RBAC for tenants, branches, groups, and employees.
- Created automated commission engines with rules, qualifiers, targets, tiers, caps, and pay cycles for complex compensation workflows.
- Developed AI-powered scheme evaluation, nudges, anomaly detection, insights, and LLM workflows using batching, rate limiting, and structured outputs.
- Built real-time dashboards for ROI, commissions, disputes, payouts, and employee metrics while optimizing 150K+ record datasets using async queries, Redis caching, scalable APIs, and AWS cost-efficient infrastructure.

EDUCATION

B.Tech in Computer Science and Engineering, APJ Abdul Kalam Technological University

Nov 2021 – Apr 2025

ACTIVITIES

Finance Lead, Innovation and Entrepreneurship Development Centre (IEDC)

Jan 2024 – Feb 2025

- Led 12+ student programs for 100+ participants while reducing audit time by 50% through process improvements.

CERTIFICATIONS

Back End Bootcamp – GDSC (Sep 2022), Front End – React (Nov 2022), Data Analysis – FreeCodeCamp (May 2025).
